

Advanced Protection from Unauthorized Executables

Faronics Anti-Executable ensures only approved applications are allowed to run on a computer. Any other programs – whether malicious, unlicensed, or simply unwanted – are blocked from ever executing.

Anti-Executable offers protection form today's advanced threats like 0-day attacks, mutating malware, and advanced persistent threats. By providing security beyond anti-virus, it eliminates reliance on critical blacklist updates. It simplifies IT management with standardized configuration and ensures computers are available when needed. It also assists with compliance, saving organizations time and money. Advanced features such as publisher based approvals, policies, and user-level protection balance security and flexibility.

Anti-Executable Benefits

Advanced Security & Control

- Protects users from unknown threats such as keyloggers, spyware, and malware
- · Allows only approved executables to run

Boost IT Productivity

- Apply standardized configuration using central management
- Helps to enforce download policies

Greater Flexibility

 Create policy-based user groups customized for different computer usage needs

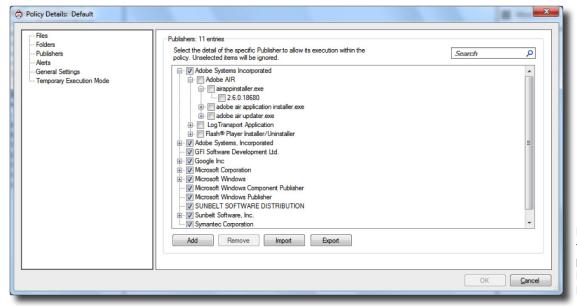

Saves Money

- Reduces the volume of IT support tickets
- Ensures computers, system, and bandwidth are used for intended purpose

"Anti-Executable and Deep Freeze are crucial to preserving an image determined for mission critical law enforcement systems used 24x7 to ensure reliability and security with minimal downtime and with the least reliance on IT personnel."

- Chief Tim Riley, CIO and Bureau Chief, Los Angeles Police Department Information and Communication Services Bureau

Enjoy better control with four levels of granular publisher control: Certificate, Product Name, Porgram File, and File Version

Key Features

Security Features

- · Protects against malware, spyware, and unwanted software
- Only program allowed by a Policy will run
- Allows only authorized users to configure and disable protection

Control List & Policies

- Automatic creation and maintenance of controls and policies
- Can be imported, exported, viewed, edited, searched, merged, and sorted
- Folder-level protection feature allows specific folders to be exempt from protection regardless of their location
- Creates a log of all unauthorized installation attempts
- Scanning of remote workstations to augment control list and policies

Compatibility Options

- Compatible with major third-party anti-malware, anti-virus, and firewall applications
- Complements Active Directory and Group Policies
- Offers option to designate specific applications to be Trusted and exempt from restriction, like anti-virus programs
- Maintenance Mode allows software updates and installations

Integration Options

- Integrates with Faronics Deep Freeze: automatically enters
 Maintenance Mode when it detects that a Deep Freeze Maintenance
 Event has Thawed the computer
- Integrates with Faronics Anti-Virus: ensures initial installation scan is free from malware

Reporting Section

Contains five reports: Activity, Temporary Execution Mode, Additions to Local Control List, Additions to Central Control List – Files, and Additions to Central Control List – Publishers

Expanded Flexibility Options

- · Allow or block execution of applications regardless of location
- Schedule shutdown, restart, and Wake-on-LAN actions
- Temporary Execution Mode to allow unrestricted file execution for a specific time period
- Ability to run a report on executed programs during Temporary Execution Mode

Expanded Protection and Control

- · Granular control of publishers with four-levels of control
- Offers silent install option for rapid network deployment
- Provides password protection for complete security
- Offers ability to enable or disable Anti-Executable on the fly
- · Deploy as part of a master image
- Displays a customized violation message when a user attempts to perform an action that is not authorized by Anti-Executable
- Unique protection levels for Administrators, Trusted, and External users
- Stealth Mode hides the presence of Anti-Executable while keeping the computer fully protected
- Includes IdentiFile a tool to compare files against a signature database for better visibility into file attributes
- Control over .exe, .dll, .com, .scr, .jar, .bat, and .bin files

Enterprise Control

- Faronics Core provides centralized deployment, configuration, scheduling, and control
- Install Anti-Executable on any or all workstations
- Activate/deactivate protection on one or more computers
- Manage and export log records of violation attempts
- · Change maintenance schedules on the fly
- Group and filter workstations for easy management
- · Instantly update passwords on protected workstations
- Communicate with computers over a LAN, WAN or the Internet
- ActiveTask feature ensures changes are applied to unavailable workstations by resending tasks when the computer can be reached

System Requirements

Faronics Anti-Executable can be installed on the 32 bit edition of Windows XP SP3 and 64 bit edition of Windows XP SP2, 32 and 64 bit editions of Windows Server 2003, Windows Server 2008. Windows Vista, and Windows 7. Faronics Core system requirements can be found in the Faronics Core guide. The hardware specifications are the same as those required by the host operating system. It is also available in Standard for standalone computers and enterprise networked computers.
