Deep Freeze Command Line Control (DFC.EXE)

The *Deep Freeze Command Line Control (DFC)* offers network administrators increased flexibility in managing Deep Freeze computers. DFC works in combination with third-party enterprise management tools and/or central management solutions. This combination allows administrators to update workstations on the fly and on demand.

It is important to note that DFC is not a stand-alone application. DFC integrates seamlessly with any solution that can run script files, including standard run-once login scripts.

DFC commands require a password with command line rights. OTPs cannot be used.

List all commands by calling DFC without parameters.

The files are copied to C:\WINDOWS\system32\DFC.exe on 32-bit systems and to

C:\WINDOWS\sysow64\DFC.exe on 64-bit systems.

DFC Return Values

On completion of any DFC command, the DFC returns the following values:

Value	Description
0	SUCCESS or Boolean FALSE, for commands returning a Boolean result
1	Boolean TRUE
2	ERROR - User does not have administrator rights
3	ERROR - DFC command not valid on this installation
4	ERROR - Invalid command
5 - *	ERROR - Internal error executing command

2 Faronics

DFC Command Line Syntax

Syntax	Description
DFC password / BOOTTHAWED	Restarts computer in a Thawed state; only works on Frozen computers.
DFC password / THAWNEXTBOOT	Sets computer to restart Thawed the next time it restarts; only works on Frozen computers and does not force computer to restart.
DFC password / BOOTFROZEN	Restarts computer into a Frozen state; only works on Thawed computers.
DFC password / FREEZENEXTBOOT	Sets up computer to restart Frozen the next time it restarts; only works on Thawed computers and does not force computer to restart.
DFC get /ISFROZEN	Queries computer if it is Frozen. Returns error level 0 if Thawed. Returns 1 if Frozen.
DFC get /CLONE	Sets the clone flag for the purpose of imaging.
DFC password / CFG=[path] depfrz.rdx	Replaces Deep Freeze configuration information. Works on Thawed or Frozen computers. Password changes are effective immediately. Other changes require restart.
DFC get /version	Displays Deep Freeze version number.
DFC password / UPDATE=[path to installer file]	Sets up computer to restart in a Thawed state and install a Deep Freeze update.
DFC password /LOCK	Disables keyboard and mouse on computer. Works on Frozen or Thawed computer and does not require a restart.
DFC password /UNLOCK	Enables keyboard and mouse on computer. Works on Frozen or Thawed computer and does not require a restart.
DFC password / THAWLOCKNEXTBOOT	Sets up computer to restart in a Thawed state with keyboard and mouse disabled; only works on Frozen computers.
DFC password / BOOTTHAWEDNOINPUT	Restarts computer in a Thawed state with keyboard and mouse disabled; only works on Frozen computers.
	Displays the status of the license and the expiry date of the license (if any). The different possible types of license and the associated return codes are:
DFC get /LICENSESTATUS	111: Unlicensed — Deep Freeze is not licensed and will operate in Evaluation mode for 30 days since installation.
bro gee / Brobhodomino	112: Evaluation — licensed for evaluation with a fixed expiry date.
	113: Licensed — licensed with no expiry date.
	114: Expired — The Evaluation period has expired.
	Displays the status of the license and the expiry date of the license (if any). The different possible types of license and the associated return codes are:
	111: None (Unlicensed) — Deep Freeze is not licensed and will operate in Evaluation mode for 30 days since installation.
	112: Evaluation — licensed for evaluation with a fixed expiry date.
DFC get /LICENSETYPE	113: Standard (Licensed) — licensed with no expiry date.
	114: Not for Resale — Licensed with no expiry date.
	115: Subscription
	116: Subscription - Evaluation
	117: Subscription - Not For Resale

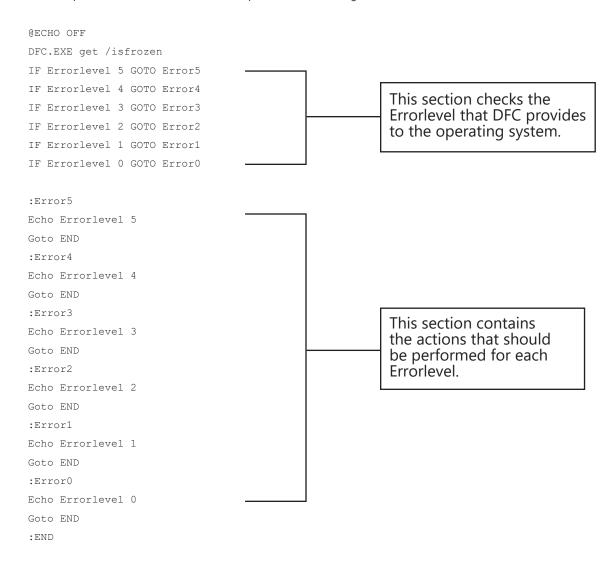

Faronics'

Syntax	Description
	Changes the License Key.
	password is the Deep Freeze Administrator password.
DFC password /	licensekey is the License Key for Deep Freeze.
LICENSE=licensekey	If there is an error, the following error codes are displayed:
	101: The License Key is not valid
	102: The License Key provided has already expired.
DFC password / ACTIVATE	Activates the workstation after checking with the Faronics License Activation Server.
	Displays the Deep Freeze license activation status.
	Returns the following values:
	0: Pending activation
DFC get /ACTIVATION	1: Active
	2: Authorized
	3: Deactivated
	4: Rogue
	Windows Updates will be downloaded and installed on the workstation.
DFC password /WU [/	[/UNLOCK] Optional parameter to enable the Keyboard and Mouse during Windows Update.
UNLOCK] [/NOMSG / NOMESSAGE] [/THAW]	[/NOMSG /NOMESSAGE] Optional parameter to suppress all informational/warning messages from DeepFreeze during Windows Update.
	[/THAW] Optional parameter to return the machine into Thawed State after completion of Windows Update.
DFC password /ENDTASK	Ends the ongoing Workstation Task and reboots into Frozen state. Batch File Task and Thawed Period Task end immediately. Windows Update Task is completed.
DFC password /ENDTASK [/SHUTDOWN]	Ends the ongoing Workstation Task and reboots into Frozen state. Batch File Task and Thawed Period Task end immediately. Windows Update Task is completed.
	[/SHUTDOWN]Optional parameter to shut down the workstation.
DFC password / FORMATTHAWSPACE	Formats all the ThawSpaces on the workstation. Data stored on the ThawSpaces will be deleted permanently.
DFC password /	Deletes all the ThawSpaces on the workstation. Data stored on the ThawSpaces will be
DELETETHAWSPACE	deleted permanently.

Batch File Example

The example below shows how to check for a specific error level using a DOS Batch file:

Actions can be placed between the ECHO Errorlevel # statement and the Goto END statement for each of the detected error levels. To use this Batch file to automatically Thaw a Frozen workstation, the following section of the Batch file would have to change to the following:

```
:Error1
Echo Errorlevel 1
DFC.EXE password /BOOTTHAWED
Echo
Goto END
```
