Deep Freeze Server Standard Feature History

Version 7.3 (March 2012)

- Improvements in Deep Freeze WMI Classes.
- License expiry notification displayed in the system tray.
- Improved Deep Freeze performance related to Terminal Services and Roaming Profiles.

Version 7.0

New Features

- Enhanced security.

Version 6.62

New Features

- Officially supported on Windows Server 2008 R2.
- Licensing:
Deep Freeze now employs the same licensing scheme as other Faronics products. Therefore, a valid License Key must be entered into the product in order to prevent it from expiring after a 30-day evaluation period.
- Simplified Chinese localization added.
- Rewritten password security functionality to resolve a reported potential security vulnerability in which a malicious user may be able to bypass the Deep Freeze password dialog when running as a Windows administrator user.

Version 6.30

New Features

- Windows Server 2008 support
- The *Boot Control* window provides the ability to *Reboot Now*
- System tray icon no longer flashes when machine is Thawed

Version 6.01

New Features

- Windows Server 2003 64 bit support
- Localization to English, French, German, Spanish, and Japanese languages
