

Apple Device Enrollment Program

Use organization's Device Enrollment Program (DEP) to deploy organization-owned Apple devices.

Apple Volume Purchase Program

Manage applications procured under the Apple Volume Purchase Program (VPP).

Android for Work

Manage Android Enterprise/Android for Work

SAFE Samsung for Enterprise

Manage Samsung SAFE V2+ Android smartphones and tablets securely.

MOBILE DEVICE MANAGEMENT FOR ENTERPRISES

Deep Freeze MDM provides cloud-based, over-the-air Mobile Device Management (MDM). Administer distributed deployments of all your iOS and Android devices through a powerful web-based console.

Deep Freeze MDM is designed for businesses that want to spend less time and effort to manage and secure mobile devices. Keep users productive, business data safe, and personal data private.

Flexible Enrollment

Flexible onboarding process with a number of curated enrollment options. Users can enroll devices seamlessly through built-in integration with platforms such as Apple's Device Enrollment Program (DEP), or directly enroll via Deep Freeze MDM. Once enrolled, each device downloads its configuration from the cloud, applying device restrictions, network, and other security policies automatically.

Group Settings

Group and settings provide a comprehensive suite for a wide range of device provisioning needs. This contains everything from device restrictions to specific permissions to create granular policies for managing devices dynamically and intelligently, aimed to create a delightful experience for administrators.

Centralized Administration

Deployed policies and changes are applied seamlessly from the cloud, across thousands of devices at once, helping organizations protect mobile devices over the air. Deep Freeze MDM is designed to help administrators keep managed devices up-to-date, keeping in mind the latest user demands and organizational requirements, while lowering the IT burden.

App Management

Comprehensive application management requires control, distribution, and visibility over not just apps but also licensing and inventory, as well. Deep Freeze MDM allows you to install public apps by integrating with the Apple App Store and Google Play Store, while also integrating with Apple Volume Purchase Program (VPP) and Android Enterprise (Afw) for simplifying app management.

Tracking & Control

Start monitoring managed devices as soon as they get enrolled. Gather location information from the device's GPS, down to street-level accuracy. Continue to apply policies to devices anywhere in the world. Troubleshoot and perform daily administration tasks with live actions, right from the dashboard.

Simplify BYOD

Bring Your Own Device (BYOD) programs can be easily managed while adhering to strict usage requirements of user owned devices. Automatically deliver apps, network, and security settings specific to each device and user. Prevent enterprise data from getting into the wrong hands.

FEATURES

Easy Enrollment

Enroll your iOS or Android device quickly. Allow for self enrollment in case of BYOD.

Restrict Network Access

Restrict Bluetooth, Wi-Fi Direct (SAFE 2+), MDM provisioned Wi-Fi and VPN configurations.

Remotely Push Apps

Install apps remotely from Google Play Store or Apple App Store across all your mobile devices.

Remotely Lock/ Unlock Devices

Remotely lock/ unlock devices easily in case devices are stolen/ compromised.

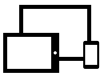

Restrict Device Functionality

Over 30 device restriction options like restricting use of camera, mic, external storage connectivity, screen capture and much more.

Remote Wipe

Retired/ lost devices can be wiped remotely to ensure data security is not compromised in the wrong hands.

Create Device Groups

Create groups for multiple mobile devices. Deploy apps, settings and restrictions to all devices within the group.

Send Messages to Devices

Remotely send messages to selected devices from the cloud-based console.

Mobile Device Management made easy with Deep Freeze MDM

Rapid Deployment

Enroll your iOS or Android device in less than a minute

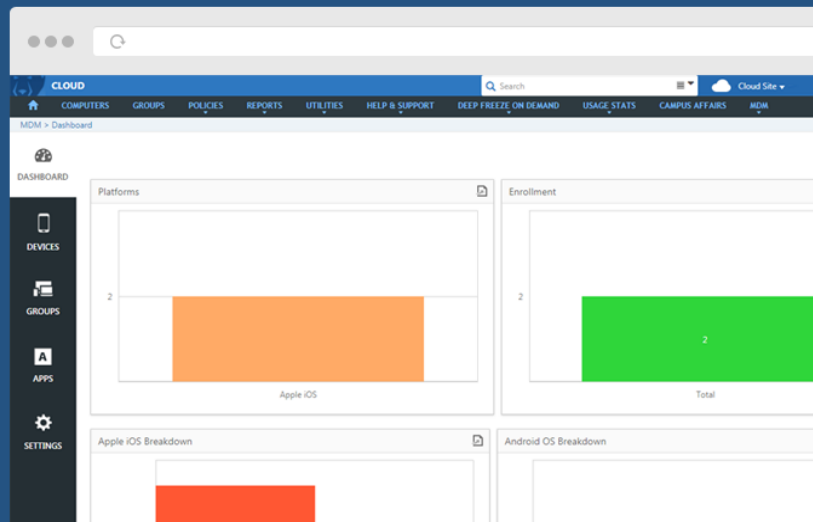

Cloud Management

Centrally manage, configure and track devices securely

User Empowerment

Ensure users personal and work data remains private and protected

SPECIFICATIONS

Supported Platforms, Enrollment and Management

Android 5 or higher including Phones & Tablets

iOS 5 or higher including iPad, iPod Touch & iPhone

App based enrollment (using Deep Freeze MDM app)

Auto enrollment through DEP (iOS 7+)

On-device enrollment

Email enrollment invitation

Site-based administration

Centralized management with Deep Freeze Cloud secure

web-based console

App Management

Inventory of installed apps

Deployment of app from Apple App Store and Google Play Store

Integration with Apple App Store and Apple's Volume Purchase Program (VPP)

Integration with Google Play Store and Android for Work (AfW)

Uninstallation of apps

Restrict app installation

Install enterprise apps

Android for Work (General)

Restrict app default runtime permissions for all apps (Android 6.0+)

Enterprise level administration to set the grant state of any permission of work apps (Android 6.0+)

Remotely specify settings for the app (Android Managed Configurations)

Restrict modification of accounts

Disable screen capture

Prevent installation of apps from unknown sources

Restrict access to Android Debug Bridge (ADB)

Prevent cross profile copy & paste by default

Device Restrictions

Deploy WiFi settings including WPA2-PSK

Restrict use of camera

FaceTime, Siri, iTunes Store, Multiplayer Gaming and Apple Music (iOS)

Restrict content consumption (Explicit music & podcasts, content rated movies, TV shows, and apps - iOS)

Enforce passcode policies and failed entry device wipe policy

Restrict use of AirDrop (iOS)

Lock wallpaper and device name (iOS)

SSID whitelisting

Monitoring & Live Tools

Hardware details and specs reporting

Device location with GPS data

Battery and storage usage monitoring

Remote device lock, unlock, and wipe

Send message to device

Selective Wipe

Android Work Managed Device (Device Owner)

Restrict modification of WiFi settings

Disable factory reset

Disable microphone

Prevent USB file transfer and mounting physical media storage

Android Device Owner Plus SAFE v2+

Disable Wi-Fi Direct, Bluetooth and Airplane mode

Restrict turning device off using the power button

Disable network time modification

Prevent stopping of system apps

Prevent Google Account Sync

Prevent use of USB, SD card and USB storage device
