

FOR IMMEDIATE RELEASE

Deep Freeze Mac Cooler Than Ever

SAN RAMON, CA, September 12, 2006 — Faronics announces the immediate release and availability of Deep Freeze Mac 3.1. Deep Freeze Mac instantly protects and preserves original computer configurations, eliminating routine maintenance, while allowing complete unrestricted access to the computer. Regardless of the changes made to a workstation, a restart resets the computer to its original state.

This latest version of Deep Freeze Mac offers several new features, including the ability to be managed directly through the console of the LANDesk® Management Suite.

“Faronics is very pleased to be working with LANDesk, given their focus on cross-platform desktop management,” said Dave Anderson, Faronics’ Deep Freeze Mac product manager. “We are very excited to be able to offer LANDesk® Management Suite administrators the ability to manage the unparalleled protection of Deep Freeze Mac directly through their LANDesk console.”

Version 3.1 also offers the option to add or delete multiple individual ThawSpaces (partitions on Frozen drives where data can be saved permanently) from within the Deep Freeze Mac Controller; ThawSpaces can now be sized anywhere from 1 MB to 120 GB. All options in Deep Freeze Mac can be pre-configured to create customized installation packages. These packages can be deployed and managed using LANDesk or Apple Remote Desktop (ARD) to provide bulletproof protection and enterprise-level control for multiple Mac environments.

Deep Freeze Mac is a Universal application for Intel- or PPC-based Macs. A 60-day, fully functional evaluation version can be downloaded free of charge at www.faronics.com/mac.

About Faronics

Faronics develops and markets intelligent utilities for absolute control of multi-user computing environments. Faronics’ market-leading solutions ensure 100% workstation availability and have dramatically impacted the day-to-day lives of thousands of information technology professionals and computing lab managers. Our user-driven, powerful technology innovations benefit educational institutions, libraries, government organizations and corporations.
