

FOR IMMEDIATE RELEASE

Deep Freeze Mac Delivers Bulletproof Computing To Leopard

SAN RAMON, CA, October 24, 2007 — In anticipation of the imminent release of Apple's latest operating system, Faronics is pleased to announce that a new version of its flagship Deep Freeze Mac security software is now available. Version 4.0 of Deep Freeze Mac offers several product improvements, support for Leopard, multiple Maintenance schedules, and the highly-anticipated Integrated Mapping feature.

Deep Freeze Mac with ARD Integration offers the most robust Mac protection available. The need for IT professionals to perform rebuilds, re-image, or troubleshoot computers is eliminated with Deep Freeze Mac's reboot-to-restore technology. The showcase feature in the new Deep Freeze Mac 4.0 is Integrated Mapping, which makes saving user data while still protecting the system software simple. IT administrators are able to map user accounts individually or by user type to a second partition or Thawspace to retain user documents, pictures, movies, music, and bookmarks.

IT administrators of large Mac deployments are already familiar with Deep Freeze Mac's ability to protect a workstation's operating system and software without restricting user access. Mac users who are protected by Deep Freeze's 'reboot-to-restore' concept are able to enjoy a clean and consistent Mac session—each and every time. IT administrators love the fact that Mac environments are easier to manage and expensive computer assets are kept running at 100% capacity. Unlike imaging technology, Deep Freeze Mac's 'reboot-to-restore' process does not increase bootup times or impact system resources whatsoever.

"I'm proud of the fact that Deep Freeze Mac provides full support for Mac OS X Leopard even before Apple has released their new operating system," said Brent Smithurst, Vice President of Technical Operations for Faronics. "Deep Freeze Mac is the leader in Mac workstation protection; the fact that we are the first to deliver total workstation consistency to Leopard is proof of that."

A free, fully functional 30-day evaluation version of Deep Freeze Mac can be downloaded at www.faronics.com. Deep Freeze Mac also offers enterprise capabilities via its integration with Apple Remote Desktop.

About Faronics

Faronics delivers software products that manage, simplify, and secure IT environments. Our products ensure 100% workstation availability, and have dramatically improved the day-to-day lives of thousands of information technology professionals. Deployed on over six million workstations in fifty countries worldwide, Faronics' technology innovations benefit educational institutions, healthcare facilities, libraries, government organizations and corporations.
