Faronics Releases Deep Freeze Mac With ARD Integration

SAN RAMON, CA, December 7, 2005 — Faronics has announced the official release of Deep Freeze Mac 2.0 with ARD integration. This all-new edition of Deep Freeze Mac allows for a completely non-restrictive working environment where there is no need to be concerned about system misconfiguration, corruption, or malicious damage to a Mac OS X system; a simple restart eradicates all changes down to the last byte and ensures that the standard system configuration is available at all times.

With Deep Freeze Mac, all changes to a machine are temporary for that working session, including the installation of new software, removal of programs, renaming or deleting files and folders, and application preference configuration.

“Deep Freeze Mac Version 2.0 takes the core functionality and all the most useful features from Deep Freeze Standard and Enterprise for Windows and delivers them in the unique and familiar Macintosh style,” said Brent Smithurst, Vice President of Technical Operations at Faronics. “All of the options can be configured on a per-workstation basis, and Enterprise-level deployment and control is available through Apple Remote Desktop.”

The entire hard drive can be Frozen (protected by Deep Freeze), including even the root user account. LDAP, Active Directory, or Open Directory accounts can be used without limitation; user data can be saved to a network location, removable media such as a USB thumb drive, or a Thawed (unprotected by Deep Freeze) partition. Deep Freeze Mac ARD is compatible with Panther and Tiger platforms.

To download a trial version of Deep Freeze Mac Version 2.0 or for more information, go to www.faronics.com.

About Faronics

Faronics develops and markets intelligent utilities for absolute control of multi-user computing environments. Faronics’ market-leading solutions ensure 100% workstation availability and have dramatically impacted the day-to-day lives of thousands of information technology professionals and computing lab managers. Our user-driven, powerful technology innovations benefit educational institutions, libraries, government organizations and corporations.
