

FOR IMMEDIATE RELEASE

Deep Freeze Standard, Professional, and Enterprise updated to Version 5.5

SAN RAMON, CA, 13 June 2005 — Faronics Technologies is pleased to announce the official release of Deep Freeze Version 5.5 for Standard, Professional, and Enterprise editions.

Version 5.5 implements several new features, including enhanced compatibility when deployed as part of a master image, the ability to specify login information for executing custom scripts during scheduled maintenance periods, and enhanced password security. This latest version also reflects Faronics' new brand image, incorporating a fresh look to enhance user experience.

Customers with a valid Maintenance Package can visit www.faronics.com to request a secure download of Deep Freeze 5.5.

To download the Deep Freeze Enterprise 60-Day evaluation version, please visit www.faronics.com.

With over 5 million installations, Deep Freeze has a proven track record of non-restrictive complete Windows protection. Completely invulnerable to hacking, Deep Freeze instantly protects and preserves original computer configurations. No matter what changes a user makes to workstation, simply restart to eradicate all changes and reset the computer to its original state — right down to the last byte. The result is a truly protected and parallel network completely free of harmful viruses and unwanted programs.

About Faronics

Faronics develops and markets intelligent utilities for absolute control of multi-user computing environments. Faronics' market-leading solutions ensure 100% workstation availability and have dramatically impacted the day-to-day lives of thousands of information technology professionals and computing lab managers. Our powerful, user-driven technology innovations benefit educational institutions, libraries, government organizations and corporations.
