

FOR IMMEDIATE RELEASE

Faronics Power Save Mac Conserves Energy

SAN RAMON, CA, May 16, 2006 — Faronics announces the release and immediate availability of Faronics Power Save Mac, an intelligent utility that effectively controls and manages Macintosh energy usage throughout an enterprise. Organizations can see significant energy savings by using Power Save Mac by scheduling their computers to log off, restart, shut down, or start up at specified times on a one-time or repeating basis.

The utility is conveniently installed as a preference pane within the Mac OS X System Preferences, and has an integrated inactivity monitor that can automatically cause computers to log out, shutdown or restart after a specified number of minutes of inactivity. This ensures that even if a Power Save event has not been scheduled, your Macs will use power as efficiently as possible.

Power Save Mac also integrates seamlessly with Apple Remote Desktop (ARD), allowing administrators to deploy a customized power saving configuration package to a single or multiple computers. ARD also offers the ability to manage the application remotely through Power Save-specific tasks.

“Power Save Mac offers administrators an easy and efficient way to automatically enhance the energy-saving capabilities of their computers and, correspondingly, how much power their computers are consuming,” said David Anderson, the Power Save Mac product manager at Faronics. “The multiple configuration options offered by the program allow for maximum flexibility and control, and could potentially save companies thousands of dollars in annual energy expenditures.”

A fully functional, 60-day evaluation version of Power Save Mac can be downloaded free of charge at www.faronics.com/mac

About Faronics

Faronics develops and markets intelligent utilities for absolute control of multi-user computing environments. Faronics' market-leading solutions ensure 100% workstation availability and have dramatically impacted the day-to-day lives of thousands of information technology professionals and computing lab managers. Our user-driven, powerful technology innovations benefit educational institutions, libraries, government organizations and corporations.
