

FARONICS™

Intelligent Utilities for ABSOLUTE Control

FOR IMMEDIATE RELEASE

Faronics Power Save Takes Intelligent Energy Management Global

SAN RAMON, CA, March 26, 2007 — Faronics has reaffirmed its role as an international leader by announcing that its intelligent energy management software, Faronics Power Save, is now available in five global languages: English, French, German, Spanish, and Japanese. Faronics Power Save is a revolutionary tool that provides central management of workstation energy consumption throughout an enterprise.

Power Save goes above and beyond the basic power saving features provided by the operating system, and matches computer energy consumption with the activity level of the user. Power Save gives administrators a number of options to customize an installation package to suit the needs of their specific environment, including the frequency of the action, what day(s) of the week the action will occur, as well as the time of day. In addition to the ability to deploy Power Save to single or multiple computers with ease, administrators can also configure sleep or shutdowns to take place based on CPU, disk, and application activity. Power Save also has the capability of generating detailed reports outlining enterprise-wide energy consumption levels and associated costs savings, allowing administrators to see the immediate financial and environmental returns on their investment.

“Faronics’ customer-centric approach is consistently focused on providing value to our users,” said Shaun Applebaum, Product Manager for Power Save at Faronics. “Localization is a great way to cross linguistic barriers, open doors to new markets, and provide choices to our customers that demonstrate value and respect for their culture.”

A fully functional, 30-day evaluation version of Power Save can be downloaded free of charge at www.faronics.com/powersave. Power Save is currently available for both Windows 2000/XP and Mac OS X 10.3 and higher.

About Faronics

Faronics develops and markets intelligent utilities for absolute control of multi-user computing environments. Faronics’ market-leading solutions ensure 100% workstation availability and have dramatically impacted the day-to-day lives of thousands of information technology professionals and computing lab managers. Our user-driven, powerful technology innovations benefit educational institutions, libraries, government organizations and corporations.
