

Deep Freeze for Corporate Environments

Faronics Deep Freeze has a well established record of helping SMEs and Large Enterprises maximize their IT productivity and achieve operational continuity through its patented 'reboot to restore' technology.

The IT staff used to travel at the drop of a hat when something broke at remote sites, now they don't have to do that. With Deep Freeze, we are able to centrally manage all our IT assets.

Michael Howes, SkyWest Airlines

SkyWest Airlines

SkyWest required a solution that could enable them to manage 700 computers remotely and perform maintenance easily.

The company leverages computers in both its airline divisions, which are also used for recording aircraft maintenance and training sessions. The computers are housed within the training labs and scattered kiosk sites throughout airports.

Deep Freeze Enterprise reduced time and expenditure spent on troubleshooting computers and traveling.

Adobe

Adobe chose Faronics Deep Freeze as the solution to manage the Macs used in the training labs at their flagship event 'Adobe Max 2014', maintaining operational efficiency of the training lab used for delivering hands-on training to 5000+ attendees.

Deep Freeze enabled the Adobe IT team achieve their mandate of turning around the labs within 30 minutes.

Freedom First Credit Union

Freedom First's IT team was searching for ways to minimize the time they spent on troubleshooting IT issues and to significantly reduce the impact on employee productivity that occurred when their endpoint computers were compromised. Computers that required reimaging were often unavailable for several hours.

After Faronics Deep Freeze was implemented, IT could simply reboot the workstations every evening to eradicate any possible IT issues and provide their end users a pristine workstation.

DoEx

DoEx uses Faronics Deep Freeze to reduce interruptions to the check-out process and ensure steady back-end operations, all with a simple reboot, guaranteeing uptime for several hundred unique retail sites.
