What is WINSelect?

Controlling user activity on public use and kiosk computers is a problem that IT personnel continually face. IT administrators want a solution that allows them to easily manage user access to certain applications, web sites, and menu options so that they can influence how a workstation is used. Faronics WINSelect protects a computer's purpose by empowering administrators with full control over a workstation's abilities. Windows operating system features, Start menu functionality, Internet Explorer capabilities, and Windows Explorer options can all be heavily customized to suit organizational needs.

System Requirements

Windows XP Professional SP3 (32-bit or 64-bit), Windows Vista (32-bit or 64-bit), Windows 7 (32-bit or 64-bit) or Windows 8 (32-bit or 64-bit). It is highly recommended that all components be installed using the Windows Administrator account.

Installing WINSelect

To install WINSelect on a single computer, complete the following steps:

1. Double-click the file *WINSelect_Standard.exe* to begin the installation process.
2. Follow the steps presented, and read and accept the license agreement.
3. Click *Install* and WINSelect is installed on the computer.

Once installed, WINSelect is accessible by either using the hotkey combination of CTRL + Shift + Alt + F8 or Shift+ double-click on the WINSelect icon in the System Tray.

The evaluation version of WINSelect is valid for 30 days. To upgrade to the full version of WINSelect enter a valid Licence Key in the space provided in the About node.

If no Key is entered after 30 days WINSelect is disabled.
