AUTOMATE MUNDANE IT TASKS TO REDUCE MAINTENANCE COSTS

A powerful 10-page guide on how to run specific IT environments in auto-pilot mode

Why Do I Need To Automate Maintenance Tasks?

1

A huge chunk of IT budgets go into maintaining existing setups.

GARTNER
STATS

An unmanaged computer can cost upto \$5,000 per year.

It Reduces Costs

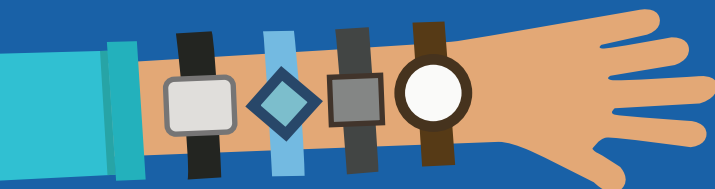

2

The effort spent in resolving support tickets leaves IT teams with no time to focus on key projects.

GARTNER
STATS

67% of all IT spending is just to sustain the IT infrastructure, not to innovate or transform the business.

It Saves Time

So What Are Some Of These Mundane IT Tasks?

Standardizing software platforms and configurations

Deploying operating system patches, security updates and data back-ups

Tracking viruses, spyware, hackers and physical threats

Controlling user access to applications, system settings, network resources, databases and other IT assets

Fixing unnecessary changes due to configuration drift

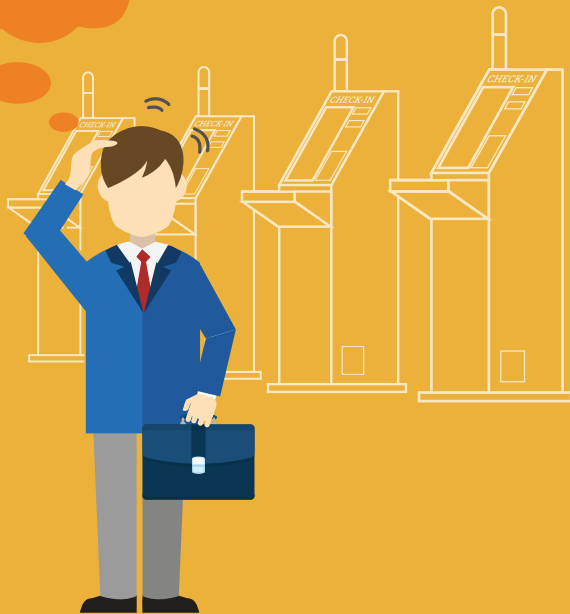

Such tasks
affect team's
productivity
& incur
recurring
IT spending
