

OS IMAGE DEPLOYMENT

Remotely Deploy Images to
Windows Endpoints

Simplify OS deployment by pushing an image to your new or existing endpoints from a web-based console.

❑ EASY TO USE

Get started quickly with an intuitive imaging solution that is easy to understand and setup. Our solution is designed for non-tech savvy people as well.

❑ SIMPLIFIED DEPLOYMENT

Simplify OS deployment to new and existing computers by automating the Windows installation settings and creating deployment packages.

❑ DEPLOY ANYWHERE

Provision the same image to dissimilar hardware simultaneously, regardless of vendor or model of the computers.

❑ AGENTLESS COMPUTERS

Image brand-new or existing computers that may still not have the Imaging Agent installed by utilizing PXE technology to network boot your computers.

❑ CLOUD-BASED

Capture and image computers from any browser, from anywhere. Simply set up your imaging server once within your local network.

❑ IMPROVE PRODUCTIVITY

Save valuable IT time by eliminating the need to physically walk up to a computer and reinstall the OS or deploy a new image.

❑ WDS INTEGRATION

Continue to utilize existing images that you may have already create via your Windows Deployment Services environment.

❑ BUILD YOUR IMAGE

Utilize the power of Deep Freeze Cloud to remotely deploy applications, install Windows Updates, and secure the computer before capturing your golden image.

Start to Image Computers in 3 Easy Steps!

1

CREATE

Create an OS image using specialized imaging techniques that provide both online and offline options.

2

CUSTOMIZE

Customize the image as desired. You can use Deep Freeze Cloud to install your desired applications and patches.

3

DEPLOY

Deploy the OS image across multiple computers using your Deep Freeze Cloud console.

Key Features

CLOUD-BASED IMAGING

Capture and deploy OSs to all your remote computers from any browser using Deep Freeze Cloud console.

WINDOWS OS MIGRATION

Upgrade from Windows 7 to Windows 8.1 to Windows 10 and every version thereafter without the technical challenges.

IMAGE BARE-METAL COMPUTERS

Boot brand-new target computers at your convenience leveraging PXE / Network booting features.

ZERO TOUCH, FULLY AUTOMATED

Create pre-defined installation settings so you can automate the Out-of-box experience for different departments or user roles.

HARDWARE INDEPENDENT

Deploy a standardized OS image to any computer, regardless of vendor or model with pre-created Driver Groups.

CAPTURE GOLDEN IMAGE

Capture your perfect disk image of different OS versions with a few simple steps right from the comfort of a web browser.

CENTRALIZED REPOSITORY

Store the images in a centralized repository (network share) and perform OS deployment on the go.

CUSTOMIZED DEPLOYMENT

Create deployment packages that meet the needs of your complex environment with custom settings.

POST DEPLOYMENT LAYERS

Deliver and managing Applications, Windows updates and Security features across your environment.

Working with Deep Freeze is a no-brainer. We charge clients on an hourly basis.

Which means we have little time to waste, when it comes to managing inconsistent endpoints.

One Console to Deploy, Update and Manage

SYSTEM REQUIREMENTS

Windows 7 (32-bit or 64-bit)
Windows 8.1 (32-bit or 64-bit)
Windows 10 (32-bit or 64-bit)

IMAGING SERVER

Windows 8 (32-bit or 64-bit)
Windows 10 (32-bit or 64-bit)
Windows Server 2012 R2 (64-bit)
Windows Server 2016 (64-bit)
Windows Server 2019 (64-bit)

For Preboot eXecution Environment (PXE) boot, Windows Server OS is required.
