

USAGE STATS

Make Smart IT Decisions
and Stay Compliant

Gain Control of Your IT Inventory Through Intelligent Reports and Dynamic Widgets

IT administrators are often blindsided and overwhelmed by the sheer number of IT assets in their environment. As a consequence, IT assets end up being either over-deployed or under-utilized leading to increased expenses and non-compliance with licensing norms. Our Asset Management provides comprehensive insight into the deployment and usage of IT assets in your environment, allowing you to make informed IT decisions.

❑ OPTIMIZE DEPLOYMENT OF IT ASSETS

Understand software and computer usage patterns to identify the most used assets and reallocate resources appropriately.

❑ SAVE MONEY

Identify and remedy instances where software licenses are under-utilized, thus saving money.

❑ VISUALIZE ASSET USAGE

Comprehensive dashboard with dynamic widgets visually depicts usage data.

❑ MAINTAIN REQUISITE RECORDS

Generate detailed reports for software license audits and easily store and retrieve licensing information.

❑ STAY COMPLIANT

Track when a software product is over-deployed to ensure adherence with licensing agreements.

❑ KNOW YOUR POWER USERS

Identify and prioritize users who are utilizing IT assets the most.

❑ GET INSIGHTFUL REPORTS

Detailed reports provide all the usage and compliance information you need to make IT decisions.

❑ MANAGE WITH A CENTRAL CONSOLE

Management, deployment and configuration are made possible via a single web-based console.

Did You Know?

Up to **30%** of an IT budget could be saved by effective asset management.

- Gartner

Deep Freeze Cloud

provides one console to Secure, Update and Manage your computers.

Key Features

USAGE STATS DASHBOARD

Displays key computer usage, software usage, and license utilization data at a glance through dynamic widgets.

DEPLOYED SOFTWARE INVENTORY

Comprehensive list of software deployed in the environment with details like publishers, versions and number of deployments. Maintains a list of your licensing agreements.

APPLICATION USAGE TRACKING

Analyze application utilization by total usage, different users, duration used, and last used.

COMPUTER USAGE TRACKING

Provides visibility into the usage of computers and deployed software with details such as duration, logins and number of users.

LICENSE COMPLIANCE TRACKING

Tracks software deployment by comparing it against the authorized number of licenses. Indicates whether software is over-deployed or under-utilized.

USER LOGIN TRACKING

Enables the tracking of user login patterns via number of logins, total usage, average session duration, and first and last login.

EXPORTABLE REPORTS

Export detailed computer and application use reports by user for compliance audits and decision-making purposes.

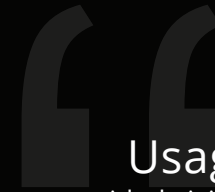

MANAGED AND NON-MANAGED APPS

Manage inventory of all installed applications or easily exclude applications which are freeware or non-essentials.

CENTRAL MANAGEMENT

Available with a hosted console to make deployment, configuration and management of updates a breeze.

Usage Stats

provided visibility into the most utilized computers and applications and helped to make informed decisions on how to best reallocate resources.
