Faronics Deploy

Next generation computer management for Windows and Mac

Manage. Update. Automate.

LIGHTNING FAST DEPLOYMENT OF
APPLICATIONS, WINDOWS UPDATES
AND
OPERATING SYSTEMS

LIGHTNING FAST ACTIONS

Perform on-demand actions such as installing applications, patching Windows, or remoting into computers.

STAY SECURE

Install Faronics Anti-Virus for comprehensive protection from malware and security threats.

SCALABLE CLOUD CONSOLE

Manage any number of computers independently with decentralized cloud-based architecture.

REAL-TIME, INTUITIVE INTERFACE

Manage your computers in realtime with the always-connected Control Grid.

CONTROL FROM ANYWHERE

Remote into computers, deploy software and update patches from a single web-based console.

MULTI-PLATFORM CONTROL

Perform application updates, inventory devices, and remote over the web for Windows and Mac operating systems.

APPLICATION MANAGEMENT

Set up, deploy and automate updates for any app instantly

INSTALL, UNINSTALL, UPDATE APPS

Instantly Deploy and Auto-update 80+ apps from our extensive library. We keep installers up to date. Setup your own apps with Custom Apps.

GROUP APPS AND COMPUTERS

Install multiple apps on a group of computers with a single click. Update apps across the environment. Uninstall unwanted apps from everywhere.

SCRIPTS AND CONTROL PANEL

Apply Pre-built templates to configure Control Panel settings.

CACHING AND MORE

Optimize bandwidth with one-click cache server setup, tag computers, power cycle and Wake On LAN.

Deploy 2021 | 03

APPLICATION MANAGEMENT

1 MANAGE

View all apps deployed in your environment and see which ones are out of date.

Use the Smart Grid to sort or filter by Applications to see which Apps are missing from computer groups.

2 UPDATE

Delete unwanted apps and automatically update the ones you need.

Silently deploy apps to groups of computers based on live Inventory data.

3 AUTOMATE

Set daily or weekly automated updates and enable caching to save bandwidth.

Presets help deploy sets of apps in a click. If computers are offline, queue installation for whenever they are switched on next.

WINDOWS UPDATES

Automate Discovery, Testing, and Deployment of Windows Updates

CATEGORY / KB CONTROL

Approve updates at a Category or KB level.
Test Patches on a control group before production roll-out.

Windows Update Patches

PATCH SCAN

VIEW PATCH HISTORY

PATCH SCAN HEARTBEAT

Frequent Patch Scans reveal missing Windows Updates. Approve and Install patches.

Patch Name	KB Num
Intel - Other hardware - Xeon(R) processor E3 - 1...	
Intel - Other hardware - Intel(R) Q77 Express Chi...	
Intel - Other hardware - Intel(R) 7 Series/C216 Ch...	
Intel - System - 9/19/2017 12:00:00 AM - 11.7.0.1...	
Lenovo - System - 11/13/2017 12:00:00 AM - 1.0....	

ZERO DISRUPTION FOR USERS

End-user options for Deferral of Update cycles and Reboots. Adhoc or scheduled maintenance options.

APPROVE	DENY		
Installed	**Pending...**	**Restart...**	**Approval Status**
0	1	No	Approved by Policy
0	1	No	Approved by Policy

WINDOWS UPDATES

1 MANAGE

Automated Patch Scans show which Windows Updates are pending across different update categories.

Tag computers by Windows Build versions.

2 UPDATE

Select and approve the categories to update, such as Definition or Security Updates. Automate or Lock updates, get complete control over Windows Updates.

Use Granular Control on Windows Build Updates to set Category levels or control patches individually.

3 AUTOMATE

Schedule Patch Scans at desired intervals and automatically update Security Updates as Microsoft releases new patches.

Freeze computers on a specific build. Defer build updates if you want to avoid zero-day bugs and update when builds are stable.

REMOTE CONTROL

Remotely connect to endpoints and chat with users

RDP/VNC OVER THE WEB

Support and Assist computers in and outside your network easily with VNC and RDP.

FILE TRANSFERS AND CHAT

Drag and drop files to transfer to remote computers, or initiate a chat session over VNC.

HELPDESK TICKETING MODULE

End-users submit tickets that can be managed in the console. Email alerts ensure timely handling.

ONE-CLICK FIXES FOR ISSUES

Build a collection of scripts for recurring issues. Create fix sequences using Configurations.

REMOTE CONTROL

1 FIND

Receive incoming tickets from users via the ticketing utility that can be enabled on all endpoints in a single click.

Sort through User Helpdesk Tickets by the Groups and Sites from where they originate.

2 FIX

Assist users via VNC with in-built chat at any time, from anywhere.

Handle recurring issues using one-click PowerShell script-based fixes without having to remote into computers.

3 AUTOMATE

Solve reported issues by using Pre-packaged scripts from the library.

Schedule script fixes for known issues over the weekend or during low usage periods identified using the Analytics section.

OS DEPLOYMENT

Dell 3020	8

OS DEPLOYMENT

1 MANAGE

Pull diagnostic information using the Smart Grid to identify fatal issues on computers.

Automatically discover bare-metal computers with WDS.

2 UPDATE

If a complete OS overhaul is needed, simply re-install Windows in a few clicks.

Push and install Windows images via PXE in minutes.

3 AUTOMATE

Once completed, run all necessary scripts and App Installations on the target computer with Post-Imaging tasks.

The Deploy Agent is added automatically and the computers will report to the console without any intervention.

SYNCED HARDWARE INVENTORY

View installed hardware details such as RAM, HDD
with usage and BitLocker status, and network info.

WARRANTY AND SERVICE TAGS

Manage the hardware lifecycle with
warranty dates and service tag collection.

PULL MSINFO FROM THE CONSOLE

Identify underlying issues with the OS, drivers,
hardware and applications.

USAGE STATS AND TRENDS

Maximize available resources by analyzing the
utilization of applications and computers.

INVENTORY AND ASSET MANAGEMENT

1 MANAGE

View a slew of Hardware attributes such as HDD Usage, Service tags, Public/Private IP, etc.

See Software Inventory including Licensing count, dates, and more; your view is customizable using the column chooser to keep critical info handy.

2 UPDATE

Use cleanup scripts to make HDD space available if necessary. You can also enable/disable BitLocker.
Find and remove over-deployed or expired software.

3 AUTOMATE

Automate maintenance with scheduled execution of tasks.

Schedule apps to uninstall from a select group or all computers at a specified time.

MANAGE macOS

Set up, deploy and automate updates for any app on macOS
Install/Uninstall/Update applications

Automate App Store Updates

Remote-in over the web to control Macs

Remote Script Execution

ANTI-VIRUS AND FIREWALL

High performance Anti-Virus with real-time management capabilities

Active malware detection

Manage AP/Firewall with real-time controls

Get Threat Detection alerts and reports

Built-in firewall protection against network attacks
