

Faronics  
**WINSELECT™**

Lockdown any Windows computer to perform only the functions you need and prevent unauthorized usage

Standardized user environments are critical for organizations that want to reduce IT support costs and workload. Faronics WINSelect provides a quick, flexible, and scalable way to configure the functionality and feature set of any Windows computer to conform to an organization's requirements. WINSelect also complements, manages, extends, and often replaces Group Policy Objects (GPO).

Faronics WINSelect allows you to easily control your end-users' Windows experience without having to deal with GPOs.

▣ **Standardizes User Environments**

Allows the creation of a typical configuration for various usage scenarios such as public kiosks, library computers and learning environments.

▣ **Easy To Use**

Intuitive interface to configure users' Windows environments while eliminating the need to devote time to learn and use group policies.

▣ **Controls User Experience**

Provides the ability to control various aspects of the user experience and prevent unauthorized actions.

▣ **Secures Workstations**

Makes workstations secure by providing the ability to disable or prevent saving data to USB drives, disk drives, network and web-based storage.

▣ **Minimizes IT Intervention**

Provides only the intended Windows functionality to end users, thereby reducing issues caused by tampering with system settings.

▣ **Manage with a Central Console**

Management, deployment and configuration are made possible via a single web-based or on-premise console.

## Did You Know?

There are **3910**  
interrelated Group  
Policy Settings in  
Windows 10

“WINSelect has empowered our Instructional Technology teachers at each site with centralized control of the computer lab and classroom computer functions.

- Newburgh Enlarged City  
School District

## Key Features

### Kiosk Mode

Allow only specific applications, menu items and hot-key combinations. Automatically launch predetermined applications upon startup.

### Machine Lockdown and Print Limiting

Disable or prevent saving data to USB drives and disk drives. Restrict user access to specific printers and the number of pages that can be printed.

### Network and Web Control

Control access to specific IP addresses or domains. Control or block network and web-based data storage.

### Drive and File Extension Blocking

Restrict the opening and saving of files on specific drives. Block files with specific extensions.

### Application Blocking

Allow or Block a selected set of applications.

### User Session Limiting

Create time-limited user sessions with an option to extend the session. Provide users with time-limited session codes.

### Start Button and Start Menu

Hide the Start button or disable its right-click functionality. Customize the options available in the Start Menu.

### Control Panel and Desktop Restrictions

Restrict the display of Windows Control Panel applets. Prevent right-clicks on desktop icons or hide them completely.

### Windows Explorer Restrictions

Prevent functionality such as drag and drop, delete, rename, and folder creation. Restrict access to UNC paths.

### Application and Browser Restrictions

Restrict access to the functions and menu options available within Internet Explorer, Firefox and MS Office products.

### Active Directory Template Integration

Import and configure ADM templates to supplement WINSelect's features.

### Central Management

Available with an on-premise or hosted console to make deployment, configuration and management of updates a breeze.
