USAGE STATS
Make smart IT decisions

Gain Control of Your IT Inventory Through Intelligent Reports and Dynamic Widgets

IT administrators are often blindsided and overwhelmed by the sheer number of IT assets in their environment. As a consequence, IT assets end up being either over-deployed or under-utilized leading to increased expenses and non-compliance with licensing norms. Usage Stats provides comprehensive insight into the deployment and usage of IT assets in your environment, allowing you to make informed IT decisions.

> Usage Stats enables the optimal utilization of IT assets including computers and software by tracking their usage and deployment.

Optimize Deployment of IT Assets
Understand software and computer usage patterns to identify the most used assets and reallocate resources appropriately.

Stay Compliant
Track when a software product is over-deployed to ensure adherence with licensing agreements.

Save Money
Identify and remedy instances where software licenses are under-utilized, thus saving money.

Know Your Power Users
Identify and prioritize users who are utilizing IT assets the most.

Visualize Asset Usage
Comprehensive dashboard with dynamic widgets visually depicts usage data.

Get Insightful Reports
Detailed reports provide all the usage and compliance information you need to make IT decisions.

Manage With a Central Console
Management, deployment and configuration are made possible via a single web-based console.

Did You Know?
Up to **30%** of an IT budget could be saved by effective asset management.

- Gartner

> "Usage Stats provided visibility into the most utilized computers and applications and helped to make informed decisions on how to best reallocate resources.

- Gilchrist County School District

Key Features

Usage Stats Dashboard
Displays key computer usage, software usage, and license utilization data at a glance through dynamic widgets.

Deployed Software Inventory
Comprehensive list of software deployed in the environment with details like publishers, versions and number of deployments. Maintains a list of your licensing agreements.

License Compliance Tracking
Tracks software deployment by comparing it against the authorized number of licenses. Indicates whether software is over-deployed or under-utilized.

Software and Computer Usage Tracking
Provides visibility into the usage of computers and deployed software with details such as duration, logins and number of users.

User Login Tracking
Enables the tracking of user login patterns via number of logins, total usage, average session duration, and first and last login.
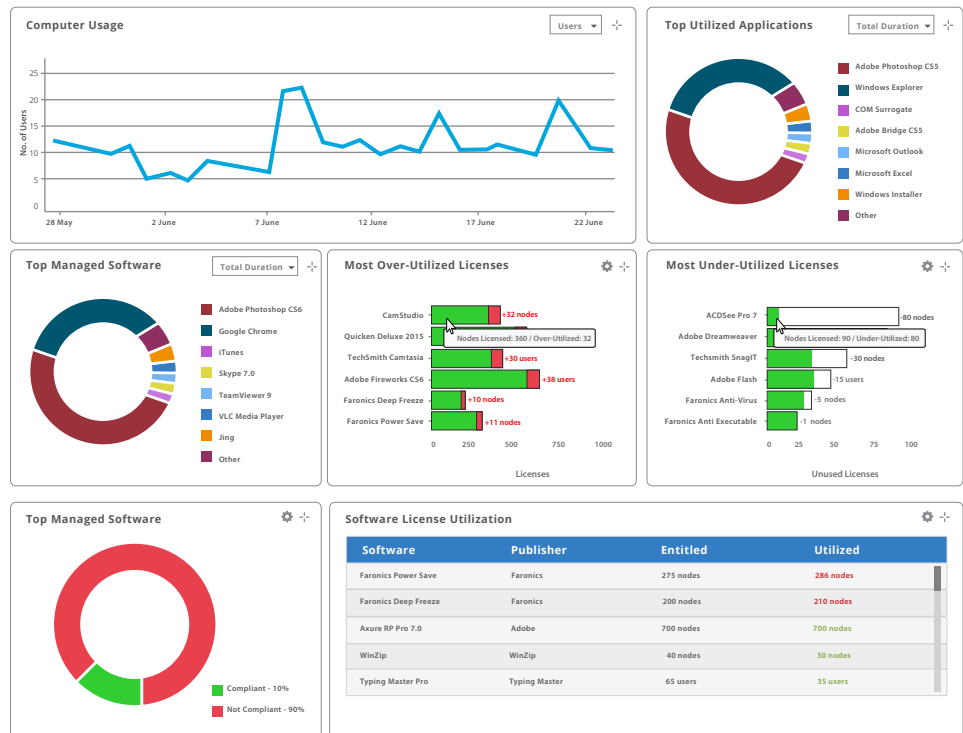

Central Management
Available with a hosted console to make deployment, configuration and management of updates a breeze.

ULTIMATE BUNDLE

Usage Stats is part of the Deep Freeze Cloud Ultimate bundle which provides multiple solutions for total control.
